GeoVision CCTV DVR Camera Servers utilize Microsoft Windows® to manage, display, and store up to 16 CCTV Cameras per server.

GeoVision technology is a multi-channel digital video surveillance system that utilizes [MPEG4](#) video compression technology.

CCTV cameras can be connected and viewed live on a local monitor screen, via the internet or thru a TCP/IP network.

The Remote Playback (RPB) Feature gives remote users download capability on any video file thru and easy to use intuitive DVR-like Video Interface.
